Educational Gameplay and Simulation Environments: Case Studies and Lessons Learned, Catalog of Copyright Entries. Third Series, Catalog of Copyright Entries, Third Series, Project Management, American Association of Motor Vehicle Administrators Bulletin, Sober Reflections, Proceedings ... Annual Meeting, World Highways, Mergers, Acquisitions and Corporate Restructuring, Bioelectronics and Medical Devices

"This book covers theoretical, social, and practical issues related to educational games and simulations, contributing to a more effective design and implementation of these activities in learning environments"--Provided by publisher.

Includes Part 1A: Books and Part 1B: Pamphlets, Serials and Contributions to Periodicals

A new edition of the most popular book of project management case studies, expanded to include more than 100 cases plus a "super case" on the Iridium Project Case studies are an important part of project management education and training. This Fourth Edition of Harold Kerzner's Project Management Case Studies features a number of new cases covering value measurement in project management. Also included is the well-received "super case," which covers all aspects of project management and may be used as a capstone for a course. This new edition: Contains 100-plus case studies drawn from real companies to illustrate both successful and poor implementation of project management Represents a wide range of industries, including medical and pharmaceutical, aerospace, manufacturing, automotive, finance and banking, and telecommunications Covers cutting-edge areas of construction and international project management plus a "super case" on the Iridium Project, covering all aspects of project management Follows and supports preparation for the Project Management Professional (PMP®) Certification Exam Project Management Case Studies, Fourth Edition is a valuable resource for students, as well as practicing engineers and managers, and can be used on its own or with the new Eleventh Edition of Harold Kerzner's landmark reference, Project Management: A Systems Approach to Planning, Scheduling, and Controlling. (PMP and Project Management Professional are registered marks of the Project Management Institute, Inc.)

Alcohol policies reflect conflicting ideological, social, health, and commercial agendas. Sober Reflections describes the development of alcohol policies at the national level and in Alberta, Quebec, and Ontario between 1980 and 2000. Using qualitative research methods, the essays examine the roles of key players, including governments, NGOs, public health advocates, and representatives of the alcohol industry. The contributors base their incisive papers on interviews with representatives from public health and the government, lobbyists, researchers, media, and those in the alcohol industries, as well as on an analysis of government documents, newspaper accounts, and official statistics.

A book on mergers, acquisitions and corporate restructuring for students and practitioners of finance.

Bioelectronics and Medical Devices: From Materials to Devices-Fabrication, Applications and Reliability reviews the latest research on electronic devices used in the healthcare sector, from materials, to applications, including biosensors, rehabilitation devices, drug delivery devices, and devices based on wireless technology. This information is presented from the unique interdisciplinary perspective of the editors and contributors, all with materials science, biomedical engineering, physics, and chemistry backgrounds. Each applicable chapter includes a discussion of these devices, from materials and fabrication, to reliability and technology applications. Case studies, future research directions and recommendations for additional readings are also included. The book addresses hot topics, such as the latest, state-of-the-art biosensing devices that have the ability for early detection of life-threatening diseases, such as tuberculosis, HIV and cancer. It covers rehabilitation devices and advancements, such as the devices that could be utilized by advanced-stage ALS patients to improve their interactions with the environment. In addition, electronic controlled delivery systems are reviewed, including those that are based on artificial intelligences. Presents the latest topics, including MEMS-based fabrication of biomedical sensors, Internet of Things, certification of medical and drug delivery devices, and electrical safety considerations Presents the interdisciplinary perspective of materials scientists, biomedical engineers, physicists and chemists on biomedical electronic devices Features systematic coverage in each chapter, including recent advancements in the field, case studies, future research directions, and recommendations for additional readings
