Health Communication, Managing procedures, Diary Methods, Construction Site Report Format, Integrated Tasks, Evaluation of Human Work, Role Reversal, The Bullet Journal Method, Basics Project Planning, Intensive Longitudinal Methods

This volume is based upon a review of available literature and intervention experiences selected from modern and traditional societies. It is augmented by the lessons learned through the editors' experience in teaching courses on health communication and foundation of health behavior in graduate public health programs at several leading universities in the United States and abroad over two decades. Examples and implications are also drawn from extensive involvement in diverse health and health communication projects, such as the on-going community-based public health project in South Central Los Angeles sponsored by UCLA and the Kellogg Foundation. This particular project is designed to develop health promotion communication interventions.

Provides guidance on how to apply the commonly used procedures, detailing the actions needed by parties to comply with the contract. This book covers: contract administration - records to maintain, review meetings, and how to use NEC procedures.

Diary Methods, sometimes known as intensive repeated measures or ecological assessments, are an important method for social and personality psychologists. The volume begins with a rationale for such methods, with an emphasis on social and personality psychology, and then provides a non-technical, accessible description of how to use such methods, including advice on study design, data analysis, and preparation of papers. Both interval contingent methods (e.g., daily diaries) and event contingent methods (e.g., social interaction diaries) are covered. The author, John B. Nezlek, has used these methods in his own scholarly work for over 30 years and has written this book to provide an introduction to these methods for those who are not familiar with them. This book will be perfect for advanced students and researchers in social and personality psychology and related disciplines who use and want to use diary methods in their research. The SAGE Library of Methods in Social and Personality Psychology is a new series of books launching in early 2011 to provide students and researchers with an understanding of the methods and techniques essential to conducting cutting-edge research. Each volume explains a specific topic and has been written by an active scholar (or scholars) with expertise in that particular methodological domain. Assuming no prior knowledge of the topic, the volumes are clear and accessible for all readers. In each volume, a topic is introduced, applications are discussed, and readers are led step by step through worked examples. In addition, advice about how to interpret and prepare results for publication are presented. The Library should be particularly valuable for advanced students and academics who want to know more about how to use research methods in social and personality psychology.

Covering English, Mathematics and Science, Integrated Tasks is a brand new series designed to help you embed ICT into your core curriculum planning.

Written by experts with real-world experience in applying ergonomics methodology in a range of contexts, Evaluation of Human Work, Fourth Edition explores ergonomics and human factors from a "doing it" perspective. More than a cookbook of ergonomics methods, the book encourages students to think about which methods they should apply, when, and why.

Want to make your students more responsible for their own learning? Want to create an academic environment in which students thrive and develop a genuine thirst for knowledge? Want to improve your students' standardized test results but avoid a "teach-to-the-test" mentality that throttles creativity and freedom? In this book, Mark Barnes introduces and outlines the Results Only Learning Environment—a place that embraces the final result of learning rather than the traditional methods for arriving at that result. A results-only classroom is rich with individual and cooperative learning activities that help students demonstrate mastery learning on their own terms, without being constrained by standards and pedagogy. By embracing results-only learning, you will be able to transform your classroom into a bustling community of learners in which * Students collaborate daily on a number of long-term, ongoing projects. * Students receive

constant narrative feedback. * Yearlong projects target learning outcomes more meaningfully than worksheets, homework, tests, and quizzes. * Freedom and independence are valued over punitive points, percentages, and letter grades. * Students manage themselves and all but eliminate the need for traditional classroom management. Learn how your students can take charge of their own achievement in an enjoyable, project-based, workshop setting that challenges them with real-world learning scenarios—and helps them attain uncommonly excellent results.

New York Times bestseller! The long-awaited book by the founder of the enormously popular Bullet Journal® planner, journal, calendar, and all-around organizational system. For years Ryder Carroll tried countless organizing systems, online and off, but none of them fit the way his mind worked. Out of sheer necessity, he developed a method called the Bullet Journal that helped him become consistently focused and effective. When he started sharing his system with friends who faced similar challenges, it went viral. Just a few years later, to his astonishment, Bullet Journaling is a global movement. The Bullet Journal Method is about much more than organizing your notes and to-do lists. It's about what Carroll calls "intentional living": weeding out distractions and focusing your time and energy in pursuit of what's truly meaningful, in both your work and your personal life. It's about spending more time with what you care about, by working on fewer things. His new book shows you how to... * Track the past: Using nothing more than a pen and paper, create a clear and comprehensive record of your thoughts. * Order the present: Find daily calm by tackling your to-do list in a more mindful, systematic, and productive way. * Design the future: Transform your vague curiosities into meaningful goals, and then break those goals into manageable action steps that lead to big change. Carroll wrote this book for frustrated list-makers, overwhelmed multitaskers, and creatives who need some structure. Whether you've used a Bullet Journal for years or have never seen one before, The Bullet Journal Method will help you go from passenger to pilot of your own life.

The main task of the classical architect is project planning, from basic evaluation to design all the way to execution planning, the call for bids, construction management, and completion of the building. This volume explains the individual planning steps in context, presents the networking of the various specialists involved in the project, and offers a clear and practical description of the various levels of organization. Themes are - Planning steps from basic evaluation to handing over the keys, - Project participants (including the authorities, specialized planners, construction firms, etc.), - Organizing the plan (sequence, what's needed when?, work organization, documentation), - Coordination of the participants.

This book offers a complete, practical guide to doing an intensive longitudinal study with individuals, dyads, or groups. It provides the tools for studying social, psychological, and physiological processes in everyday contexts, using methods such as diary and experience sampling. A range of engaging, worked-through research examples with datasets are featured. Coverage includes how to: select the best intensive longitudinal design for a particular research question, apply multilevel models to within-subject designs, model within-subject change processes for continuous and categorical outcomes, assess the reliability of within-subject changes, assure sufficient statistical power, and more. Several end-of-chapter write-ups illustrate effective ways to present study findings for publication. Datasets and output in SPSS, SAS, Mplus, HLM, MLwiN, and R for the examples are available on the companion website (www.intensivelongitudinal.com).
