Davis's Drug Guide for Nurses, Physicians' Desk Reference, World Health Organization Guidelines on the Pharmacological Treatment of Persisting Pain in Children with Medical Illnesses, British National Formulary 62, The Dying Process, Saunders Nursing Drug Handbook 2018, Quick Look Nursing: Oxygenation, 2016 Intravenous Medications, 2016 Intravenous Medications, 2017 Intravenous Medications

New edition of the number one nursing drug guide in the educational market.

Identifies thousands of prescription drugs, and provides information on ingredients, purpose, usage, precautions, side effects, and dosages

These guidelines have been developed to support countries to relieve pain in their paediatric populations. These guidelines address persisting pain in children caused by conditions such as cancer, HIV/AIDS, sickle-cell disease, burns, trauma, and phantom limb pain. Recommendations -- developed following a careful and transparent appraisal of available evidence -- are presented for the pharmacological treatment of mild, moderate and severe pain. The guidelines include chapters on the various systems used to classify pain and on the evaluation of pain, which reviews the available tools for routine pain measurement in children. Provision of sustainable pain relief within health care systems is covered in a separate chapter. Since morphine and other opioid analgesics -- required for the relief of moderate-to-severe pain in children -- are listed under the 1961 UN Single Convention on Narcotic Drugs, the new guidelines include an annex explaining the Convention's requirements for the handling and procurement of opioid analgesics for the relief of pain.

A joint publication of the BMA and the Royal Pharmaceutical Society of Great Britain. Revised twice yearly. Supersedes all previous editions

Taking as its focus a highly emotive area of study, *The Dying Process* draws on the experiences of daycare and hospice patients to provide a forceful new analysis of the period of decline prior to death. Placing the bodily realities of dying very firmly centre stage and questioning the ideology central to the modern hospice movement of enabling patients to 'live until they die', Julia Lawton shows how our concept of a 'good death' is open to interpretation. Her study examines the non-negotiable effects of a patient's bodily deterioration on their sense of self and, in so doing, offers a powerful new perspective in embodiment and emotion in death and dying. A detailed and subtle ethnographic study, *The Dying Process* engages with a range of deeply complex and ethically contentious issues surrounding the care of dying patients in hospices and elsewhere.

Organized alphabetically by generic drug name, Saunders Nursing Drug Handbook 2018 provides essential information on more than 1,000 generic and 4,000 trade name drugs. This go-to drug reference features Black Box Alerts and comprehensive coverage of IV drug administration, nursing considerations, and fixed combinations - all in a handy user-friendly format. To promote better patient care, it uniquely guides you through clinical priorities in the practice setting. New drug monographs cover approximately 25 newly approved drugs by the FDA; and thoroughly updated monographs include new interactions, precautions, and alerts. Over 1,000 generic name drugs (encompassing over 4,000 trade name drugs) are organized alphabetically with A to Z tabs to make accessing important information quick and easy. Detailed information for each drug distinguishes side effects and adverse reactions to help you identify which are most likely to occur. Special text treatment for high-alert drugs that pose the greatest risk for patient harm, as well as an appendix for drug names that sound alike and look alike, help promote safe drug administration. UNIQUE! Frequently-used herb monographs and herb interactions keep you informed of the effects of commonly encountered herbs. Classifications section features an overview of actions and uses for drug families. Top 100 Drugs list helps you easily identify the most frequently administered drugs. Nursing implications are organized in a functional nursing process framework and include headings for Baseline Assessment, Intervention/Evaluation, and Patient/Family Teaching. Information on lifespan and disorder-related dosage variations equips you with special considerations for pediatric, geriatric, hepatic, and immune- or renal-compromised patients. Extensively expanded IV content features a heading for IV compatibilities and expanded rates of infusion, reconstitutions, drip rates, test doses, flushing, and incompatibilities. Fixed combinations are included in dosages of each combined drug directly within the individual monographs to help you understand different drug dose options for specific diseases. Cross-references to the 400 top U.S. brand-name drugs are located directly in the main section of the book for easier accessibility. Customizable and printable monographs for 100 of the most commonly used drugs and quarterly drug updates are located on

the free Evolve companion site. Therapeutic and toxic blood level information shows you the patient implications for drug administration. Comprehensive IV Compatibility Chart foldout arms you with compatibility information for 65 intravenous drugs. Newly approved drugs are listed in the front of the book for quick and easy access to this timely information. A sample drug monograph with callouts helps you understand how to use the book more efficiently. NEW and EXPANDED! New drug monographs for approximately 25 newly approved drugs by the FDA equip you with the most current drug information. NEW! Thoroughly updated monographs throughout feature updated information on new interactions, precautions, alerts, patient teaching instructions, and other need-to-know information. NEW and UPDATED! Over 270 Black Box Alerts updates and additions highlight the drugs found to carry a significant risk of serious or even life-threatening adverse effects.

Core Concepts Made Easy! Intended as a quick reference, the Second Edition of Quick Look Nursing: Oxygenation assists nurses and nursing students in the development of individualized nursing care plans that incorporate the facts surrounding the concept of oxygenation. Pullouts of key terms and facts reinforce the important aspects of the respiratory and cardiovascular systems. Arising from real-life patients, the text features case studies as an opportunity for students and health professionals to incorporate the important facts and concepts when thinking about individual patients. Updated content includes: New interventions (such as CPAP) and medications for asthma and COPD New format featuring pullouts of important facts and Nursing Care sections for particular disorders Features NCLEX-Style Questions! Topics covered throughout this text include: anatomy physiology assessment and management of the respiratory and cardiovascular systems common interventions to improve oxygenation the role of the hematological system in oxygen transport

The #1 IV drug handbook for more than 40 years; Intravenous Medications: A handbook for nurses and health professionals is trusted for its accuracy and comprehensive coverage. Whether you prefer the portable print version or one of the convenient electronic formats, each drug monograph - including those for new IV drugs recently approved by the FDA - includes the drug's generic name, common trade name(s), drug category, pH, dosages and dose adjustments, dilution, incompatibilities, rate of administration, actions, indications and uses, contraindications, precautions, drug/lab interactions, side effects, and antidote - all alphabetically organized to help you find drug information quickly and easily.

Use the #1 IV drug handbook to safely administer more than 400 intravenous drugs! Gahart's Intravenous Medications: A Handbook for Nurses and Health Professionals has been trusted for more than 40 years for its accuracy, quick-reference format, and comprehensive coverage. Whether you prefer the portable print book or the eBook, each drug monograph includes the drug's generic name, trade name(s), drug category, pH, dosages and dose adjustments, dilution, incompatibilities, rate of administration, actions, indications and uses, contraindications, precautions, drug/lab interactions, side effects, and antidote. Compiled by nurse consultant Betty Gahart and pharmacist Adrienne Nazareno, this resource contains all of the information you need for the safe administration of IV drugs — nothing more than is needed, and nothing less. UNIQUE! Published annually to ensure that you have essential information on the most recently approved IV drugs, as well as updated information on existing drugs. UNIQUE! Over 400 IV drug monographs provide coverage of more drugs than any comparable handbook. UNIQUE! Time-tested, easy-to-use page layout keeps all dosage information for each drug on either a single page or a two-page spread to prevent hand contamination by having to turn a page. UPDATED! Drug side effects are reorganized according to frequency, seriousness, and other important considerations. Black Box Warnings and highlighting of key content make locating key information fast and easy. Dilution and dosage charts within monographs provide quick access to essential clinical information. Age-specific dosage variances are highlighted for geriatric, pediatric, infant, and neonatal patients. Spiral binding makes the book convenient to use in the clinical setting. Alphabetical format organizes all drug monographs by generic name, allowing you to find any drug in seconds. More than 100 lesser-used IV drugs may be accessed on the Evolve website. NEW! 9-11 new drug monographs provide you with current, clinically relevant drug information for new IV drugs recently approved by the FDA. NEW! Updated drug monographs reflect the latest changes in IV drug therapy. NEW! Do Not Confuse With information is added at the top of each applicable monograph to enhance medication safety, and the Evolve companion website includes a link to the ISMP list of Do Not Confuse drug names. NEW! Thumb tabs on left-hand pages are added to the standard right-hand thumb tabs, making it easy to look up drug monographs from either side.
