Lifts, Escalators and Moving Walks, Safety of Escalators and Moving Walks. Construction and Installation, Building Services Handbook, Elevator Traffic Handbook, Building Services, Kempe's Engineers Year-book, Handbook of materials handling, Safety Rules for the Construction and Installation of Escalators and Passenger Conveyors, International Existing Building Code 2015, Building Services Journal

Hand-rails, Printed-circuit boards, Passenger conveyors, Control equipment, Safety measures, Enclosures, Switches, Clearances, Electrical safety, Mechanical testing, Equipment safety, Instructions for use, Steps (stairs), Doors, Conveyor belts, Signs, Mechanical transmission systems, Electrical installations, Stopping, Hazards, Pallets, Dimensions, Balustrades, Braking systems, Inspection, Escalators, Marking, Velocity, Safety devices, Angles (geometry), Moving pavements, Deflection tests, Equipment housing facilities, Lighting levels

The ninth edition of Hall and Greeno's leading textbook has been reviewed and updated in relation to the latest building and water regulations, new technology, and new legislation. For this edition, new updates includes: the reappraisal of CO2 emissions targets, updates to sections on ventilation, fuel, A/C, refrigeration, water supply, electricity and power supply, sprinkler systems, and much more. Building Services Handbook summarises the application of all common elements of building services practice, technique and procedure, to provide an essential information resource for students as well as practitioners working in building services, building management and the facilities administration and maintenance sectors of the construction industry. Information is presented in the highly illustrated and accessible style of the best-selling companion title Building Construction Handbook. THE comprehensive reference for all construction and building services students, Building Services Handbook is ideal for a wide range of courses including NVQ and BTEC National through Higher National Certificate and Diploma to Foundation and three-year Degree level. The clear illustrations and complementary references to industry Standards combine essential guidance with a resource base for further reading and development of specific topics.

This second edition of this well-respected book covers all aspects of the traffic design and control of vertical transportation systems in buildings, making it an essential reference for vertical transportation engineers, other members of the design team, and researchers. The book introduces the basic principles of circulation, outlines traffic design methods and examines and analyses traffic control using worked examples and case studies to illustrate key points. The latest analysis techniques are set out, and the book is up-to-date with current technology. A unique and well-established book, this much-needed new edition features extensive updates to technology and practice, drawing on the latest international research.

A textbook for students at undergraduate and equivalent level taking courses on the built environment. It will appeal in particular to second level students of construction, building surveying, quantity surveying and architecture. While covering the full range of topics normally associated with building services, the author focuses on the treatment of energy within the built environment, as this is held to be one of the chief concerns of building consultants, building and facilities managers, inspectors and engineers.

Escalators, Passenger conveyors, Conveyors, Equipment safety, Safety measures, Accident prevention, Enclosures, Doors, Balustrades, Hand-rails, Dimensions, Angles (geometry), Velocity, Lighting levels, Equipment housing facilities, Stopping, Switches, Deflection tests, Testing conditions, Mechanical testing, Steps (stairs), Pallets, Conveyor belts, Mechanical transmission systems, Clearances, Braking systems, Safety devices, Electrical installations, Electrical safety, Signs, Control equipment, Instructions for use, Marking, Inspection, Printed-circuit boards, Design, Environmental testing

Learn the requirements needed to instill safety and stability in existing and historic buildings - without requiring full compliance with the new construction requirements in the building code. The 2015 INTERNATIONAL EXISTING BUILDING CODE SOFT COVER contains requirements intended to encourage the use and reuse of existing buildings by covering important topics such as repairs, alterations, additions, and changes of occupancy, making this an ideal addition to a user's code products. Chapter changes in this updated code include requirements related to the addition of sleeping units and dwelling units as they relate to the requirements for Accessible units, and Type A units and Type B units have been moved to Chapter 11 on Additions.
