Learn how to combat screen addiction and get your technology use in check The urge to pick up our phones every few minutes has become a nervous twitch that shatters our time into shards too small to be present. Our addiction to tech leaves us feeling exhausted and overwhelmed. But it doesn't have to be that way. In this timely book, professor Cal Newport shows us how to pair back digital distractions and live better with less technology. Introducing us to digital minimalists -- the calm, happy people who can hold long conversations without furtive glances at their phones or obsessively document everything they eat -- Newport reveals how to live more intentionally in our tech-saturated world. By following a thirty-day 'digital declutter' process, you'll learn to:

- Rethink your relationship with social media
- Prioritize 'high bandwidth' conversations over low quality text chains
- Rediscover the pleasures of the offline world

Take back control from your devices and become a digital minimalist. ----- 'Digital Minimalism is the Marie Kondo of mobile phones' Evening Standard 'An eloquent, powerful and enjoyably practical guide to cutting back on screen time' The Times 'An urgent call to action for anyone serious about being in command of their own life' Ryan Holiday 'Cal's call for meaningful and engaged interactions is just what the world needs right now' Daniel Levitin, author of The Organised Mind

Just a thousand years ago, India was dotted with universities across its length and breadth, where international students flocked to gain credentials in advanced education. This illustrated book describes how these multi-disciplinary centers of learning existed in several forms such as forest universities, brick-and-mortar universities and temple universities. It examines the funding for these citadels of learning and their graduation ceremonies. The process by which India's ancient systems of education helped to fuel a knowledge revolution

around the world with its manuscripts, forming the basis for monographs and academic papers, is explained with references. The marauding incursions by Muslim invaders, which disrupted the idyllic world of university learning in India, followed by European colonization, which led to further erosion and degeneration of India's traditional learning systems, have been taken up in some detail. Readers will get a snapshot view of India's education system down the ages from ancient to modern times.
