This is an integrated textbook on the digestive system, covering the anatomy, physiology and biochemistry of the system, all presented in a clinically relevant context appropriate for the first two years of the medical student course. One of the seven volumes in the Systems of the Body series. Concise text covers the core anatomy, physiology and biochemistry in an integrated manner as required by system- and problem-based medical courses. The basic science is presented in the clinical context in a way appropriate for the early part of the medical course.

Clear, engaging, and visual, Starr and McMillan's HUMAN BIOLOGY teaches you the core concepts of human biology and prepares you to make well-informed decisions in your life. Each chapter opens with an application that highlights the relevance of biology and motivates the study of the topic. You then learn the basic concepts which help you think critically about these issues. Useful pedagogy such as section ending Take-Home Messages and a running glossary help you understand key concepts. At the end of the chapter, Your Future and Explore on Your Own sections demonstrate the impact and personal relevance of the content.
