Jim Clark shares his experiences as a highly successful film editor at a time when films were a true collaboration of talented individuals. The legendary "Doctor" Clark was the man who could make sick films healthy again. The role of editor in the collective, collaborative process that is the making of any film is massively important but not one that is generally recognized outside the small pond that is the filmmaking community. In this wonderfully enjoyable memoir, this point becomes steadily obvious, but it is made with subtlety, discretion, and modesty. The book is also a history of the post-war film industry in England and America as well as an autobiography. As William Boyd wrote in his Introduction, "The trouble with writing an autobiography is that you can't really say what a great guy you are, what fun you are to work with and hang out with, what insight and instinct you have about the art form of cinema, and how much and how many film directors are indebted to you."

A guide to the greatest shows and films in the history of the musical, as well as their stars, lyricists and composers. Over 1600 entries provide facts, figures and critical opinion on all aspects of the field.

Offers reviews of more than three thousand albums of film, television, and stage music

All the facts and informed opinion that you need on the artists who made the history of this decade are contained in this single volume, distilled from The Virgin Encyclopedia of Popular Music, universally acclaimed as the world's leading source of reference on rock and pop history.

Including sharp critical appraisals of a host of films and such talents as Glenda Jackson, John Hurt, Monty Python and many more, 'National Heroes' is a classic work on the British film industry in the seventies and eighties.
